

Trainee (m/f/d)

Computer Science Expert – Software Development

VoiceCollect develops, manufactures and distributes professional solutions for voice recording in security-relevant applications. VoiceCollect GmbH has taken over the products and solutions of ATIS UHER SA and continues to develop them. Our core business is the development and production of voice documentation systems for air traffic control, public safety authorities, utilities and transportation.

What you can expect from VoiceCollect

Start of training: 01.08.2024

Duration: 3 years

We offer you an interesting and varied apprenticeship in a modern company with a pleasant working atmosphere and good educational opportunities. You will design and implement software projects according to customer requirements. To do this, you will analyze and plan highly complex software applications.

You will learn during your training:

- ✓ Analysis and planning of IT systems
- ✓ Conception and realization of highly complex applications
- ✓ Modification of existing applications
- ✓ Documentation of technical system documents

Your qualifications

- ✓ technical college entrance qualification, Abitur or at least a very good secondary school leaving certificate
- ✓ Good math and English skills
- ✓ Good technical understanding and interest in computer science
- ✓ Initial experience with object-oriented programming languages

Your Profile

- ✓ Fast and quick comprehension
- ✓ Strong ability to work in a team and willingness to work, learn and take responsibility
- ✓ Personal initiative and goal-oriented action
- ✓ Logical and abstract thinking
- ✓ Flexibility and customer orientation
